PROJECTS

Lanista

<https://lanista.herokuapp.com>

Persistent online game, where you manage a gladiator school. Manage gladiators training schedule, items, and skills to compete in a unique duel system. Duels/Tournaments/Gladiators are saved for future use.

Technologies used: Vue, Nodejs, Mongoose, Express, RESTful API, and tailwind

Middle Where

<https://mymiddlewhere.herokuapp.com/>

A web app to find a centralized location for a group of friends. Users can create accounts and login. Using google maps to display locations of friends and a central meeting spot.

Technologies used: Mongoose, Express, React, Nodejs(MERN), Socket.io, Google maps api, html, css and javascript.

WORK EXPERIENCE

Webroot Inc — Senior Threat Researcher

SEPT 2014 - SEPT 2022

Using my drive to learn more about cyber security, I worked my way up from technical support to advanced malware removal to threat research.

Trained new threat researchers, which resulted in them being familiar with finding malware and contributing to the team.

Responded to emails about questions about malware and how Webroot SecureAnywhere would handle it.

Analyzed SIEM data for files that were seen on end points to determine malware.

SKILLS/LANGUAGES/Frameworks

Javascript, HTML, CSS

React Vue

Git

Node.js

Mongoose, MongoDB, GraphQL, Apollo

RESTful API

Express

Socket.IO

Agile

C/C++

Windows/Linux Operating Systems

Cyber Security / Threat Researcher

COMPTIA A+ certified.

EDUCATION

University of Denver,

Full Stack Developer

JULY 2022 - OCT 2022

Colorado University,

Computer Science

2007 to 2008
